# ROADWAY DEICING SOLUTIONS

Rock Solid Performance  
where and when it matters most

We've got the **product** to  
keep roads **clear** and **safe**.

# THE CLEANEST, SAFEST ROADS FOR YOUR DEICING BUDGET

When your challenge is to provide **clear, safe** roadways on a **limited budget**, get the most for your money by looking to the experts at **Compass Minerals**. We offer a **wide portfolio** of products **guaranteed** to be available and delivered fast, so you can find the **solution** to your specific need while **saving money** in the long run.

## SOLID DEICERS MIDWEST/EASTERN US/EASTERN CANADA

### Bulk Highway DEICING Salt for snow and ice management

#### The Backbone of the DEICING Industry.

Bulk highway salt offers the most cost-effective approach to highway DEICING available. Effective to 15 F (-9 degrees C), it covers most conditions with ease.

- \* Three strategically located salt mines and extensive logistics/depot network provide you with the salt you need, readily available when you need it
- \* Decades of experience, responsive customer service, and uncompromising product quality-bulk highway DEICING salt provides excellent value for your DEICING budget

### Thawrox® Treated Salt

#### Premium Performance without Pre-wetting Systems

Thawrox is salt combines the powerful performance of magnesium chloride with the proven melting effects of rock salt delivering exceptional cold weather results, quicker reaction time all without the hassle and expense of pre-wetting equipment

- \* Uniformed blending pre-wets Thawrox which jump starts ice melting brine to bare roads more quickly.
- \* Pre-treated Thawrox salt simplifies equipment replacement and maintenance. Thawrox is delivered "wet" and ready to apply with any spreader.
- \* Thawrox fires in lower temperatures (5F/-15C) expanding window to melt snow reducing reliance on sand and spring cleanup.
- \* Up to 50% less corrosive than traditional ice control products extending the service life of equipment plus lowering maintenance costs.
- \* Flexibility to mix into sand to keep stockpiles free flowing.

## SOLID DEICERS WEST OF MISSISSIPPI

### Qwiksalt® - High Purity with More Melting Power per Ton than Red Salt

For years, salt has been the most cost effective option to keep roads clear during harsh winter conditions. Available in the Western US, QwikSalt® is the top choice for many reasons.

- \* Qwiksalt is 98.5% pure sodium chloride, the active ingredient that melts ice. Its purity doesn't leave behind clay and dirt that needs to be removed from the roadways after the storm.
- \* Mixed with magnesium chloride to enhance performance and storage
- \* Blended with an anti-caking agent for optimal flowability
- \* QwikSalt stays on the road, reducing bounce and scatter
- \* Produced responsibly, using a solar evaporation process from the Great Salt Lake in Utah

### DriRox® - High Purity Kiln Dried White Salt

Need an even drier white salt? DriRox is a free-flowing, non clumping kiln dried solar salt with a moisture content less than 0.1%. DriRox is screened to remove all fines and boulders (about 1/8" in size), resulting in a uniform grain size that ensures a predictable, effective, long-lasting ice melter.

- \* Easier mix to create brine
- \* No freezing or clumping
- \* Better flow, ideal for truck spreaders
- \* No freezing or clumping
- \* Faster acting than red salt

## LIQUID DEICERS AVAILABLE IN WESTERN US

### FREEZGARD® Liquid Magnesium Chloride

#### The Best Product Available for the Worst Weather Imaginable.

Magnesium chloride is a high quality, economical product for low temperature deicing. It's a critical tool for safe, effective winter road maintenance, and is trusted by transportation professionals to combat even the most severe winter storms. Compass Minerals offers the FreezGard line of products that consists of 30% liquid magnesium chloride solution. FreezGard is the powerful winter tool to battle snow and ice when and where you need it most.

#### FREEZGARD Zero offers:

- \* DEICING performance down to 5 F (-15 C).
- \* Use as an Anti-icing agent before a winter storm, prevent ice and snowpack bonds to pavement before they start.
- \* A safe solution for concrete and equipment, minimizes spalling and scaling.
- \* Reduces the need for sand and gravel and their associated spring cleanup.
- \* Flexibility with uses in anti-icing, pre-wetting and salt/sand pile treatment.
- \* An environmentally friendly solution made from 100% natural minerals from the Great Salt Lake.

#### FREEZGARD Zero CI Plus:

- \* In addition to the overall benefits of FreezGard Zero, this product contains a corrosion inhibitor that reduces corrosion by 85%.
- \* Meets the specifications of the Pacific Northwest Snowfighters and is listed as a Category 1 DEICER on the PNS qualified products list.
- \* Decreases damage to surfaces on aerated concrete - which is used to build highways.
